

BI-POWER **Engineering Solutions**

Your one-stop source for all your project needs

About us

At Bi-Power (Iraq), we specialize in delivering cutting-edge engineered solutions to tackle the complex challenges faced by the Oil & Gas Industry, refineries, factories, governmental facilities, and other operation sites, during construction, maintenance, and operations. Through detailed technical and commercial analysis of every request, we identify and propose the most effective strategies and solutions. By sourcing products globally and partnering with leading manufacturers, we ensure each solution is precisely tailored to meet our customers' unique demands, guaranteeing optimal performance and results.

We love data

It might sound crazy, but data drives much of how we think, whether in our research, or processes.

We love big ideas

Everyone likes a good idea, and we always try and pair our creativity with our data to turn those good ideas into "big" ideas.

We love learning

Whether learning from our mistakes, learning from our customers, or learning about new information, knowledge is a key factor in our team.

We are curious

We are always who, what, why, where, when, and how? Being curious gives us insight and perspective that shapes how we work.

We are creative

One might think that data and creativity can't come from the same company, but our team is on a mission to prove that assumption wrong.

We are diverse

We are a big family with people from several countries, which gives us unique perspectives on insights and challenges

Some of
Our happy clients

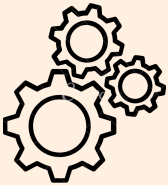

Fields of work

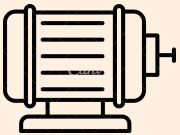

PPE & HSE.

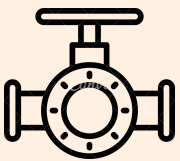

Firefighting Systems.

Instrumentation & process control systems.

Pumps, compressors, and blowers.

Valves & Fittings.

Filtration Systems.

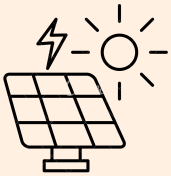

Tools & equipment.

Electrical components, and technology.

Chemical substances.

Solar & fuel power generation.

Design & consultancy.

**WE SOURCE
GLOBALLY!**

**And partner with leading
manufacturers to solve your challenges.**

Success stories

Successfully designed, supplied, and installed an NFPA-16 compliant firefighting system for a major petrol station.

Site study, parameters design, and supply of centrifugal pumps as per API-610.

Supply of firefighters' boots for extremely harsh environments as per ISO 20345, ISO 20347, and ISO 17249.

Supply of electrical hazard protection safety shoes (18kV), compliant to ASTM 2413:2018.

Designing and sizing of diesel generators for LALAV residential projects, as per ASHRAE 90.1, and ISO 8528-1.

Supply, and calibration of single and multi gas detectors, calibrations are done as per ISO/IEC 17025.

Site study, design, and supply of an inflatable emergency medical tent, as per ISO 22320, and ISO 10966.

Supply of thermal rescue imaging cameras, as per NFPA-1801 regulations.

Design for a solar power-generation system for village schools, as per IEC 62548 regulations.

And many more...
