COMPANY OVERVIEW

About Us

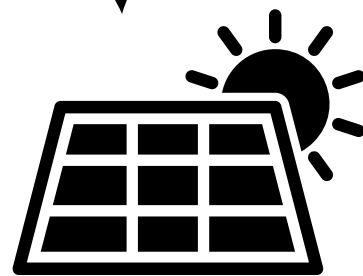

We are your premier source for comprehensive power solutions. With a focus on sustainability and reliability, we specialize in supplying, installing, and maintaining single and hybrid systems of diesel generators and solar panels. Our expert team is committed to delivering customized energy solutions that empower you to meet your power needs efficiently and responsibly. Trust us to provide top-quality products, exceptional service, and a greener future for all your energy requirements.

Or simply, we bring you power...

Bi-Power

using Diesel generators

or solar systems

or both...

Who is SANY?

Chinese multinational heavy equipment manufacturing company headquartered in Changsha, Hunan. It is the 3rd-largest heavy equipment manufacturer in the world, and the first in its industry in China to enter the FT Global 500 and the Forbes Global 2000 rankings.

SOLAR SYSTEMS POWER

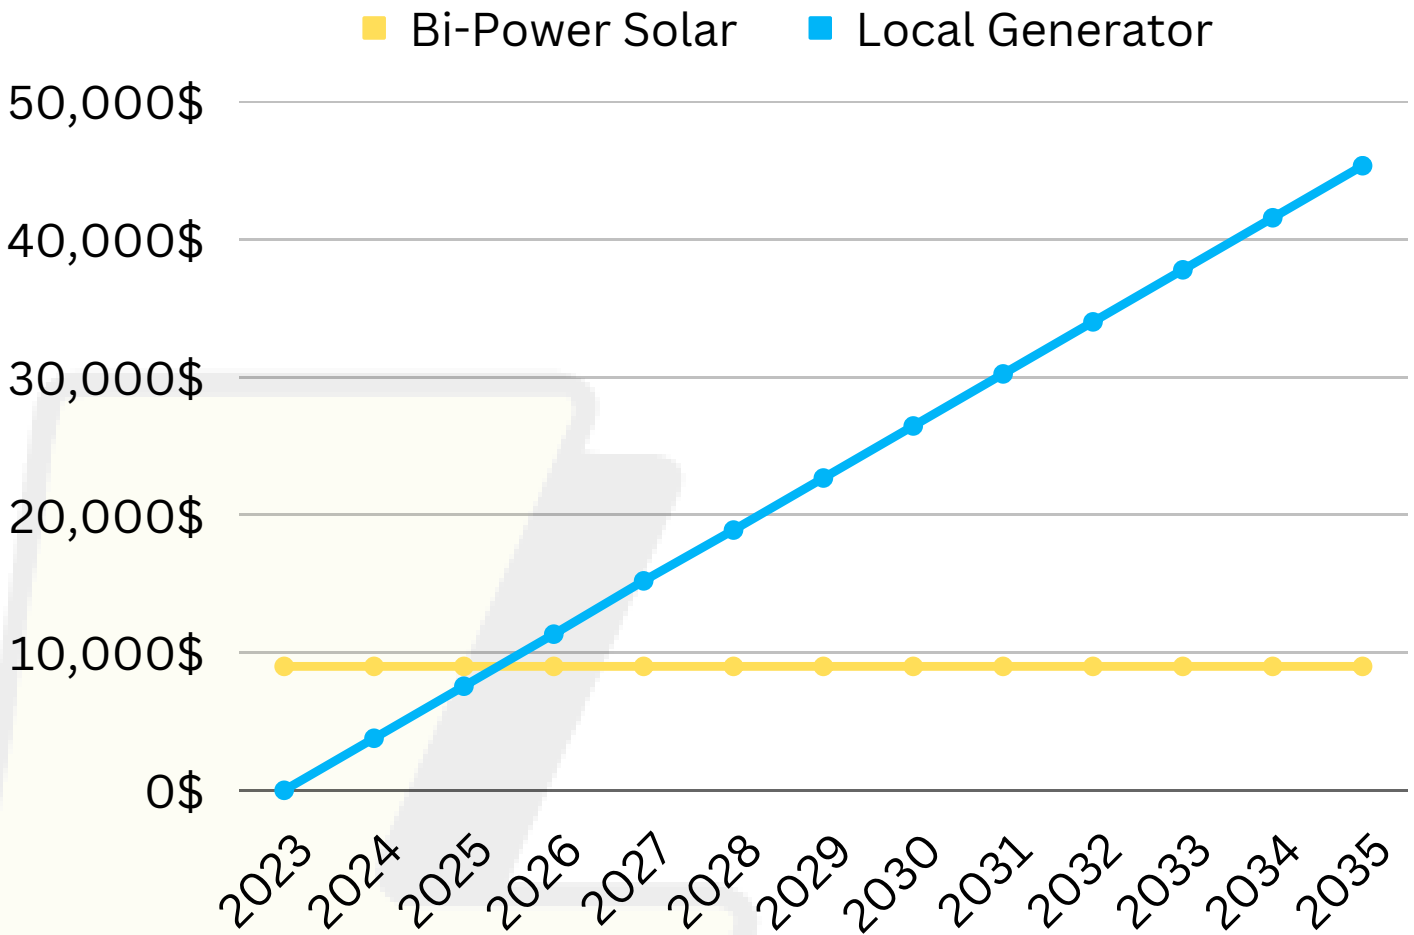

And many, many more...

We meticulously select panels based on available space, sun exposure, and energy needs, offering options like high-efficiency, monocrystalline, or polycrystalline panels. Our professional installation ensures panels are positioned for maximum sunlight exposure and seamlessly connected to your grid with high-quality inverters. Routine maintenance, including panel cleaning and performance monitoring, keeps your solar system operating efficiently, reducing your energy costs and environmental footprint.

SHOULD YOU GO SOLAR?

Let's say that you need 40A during the day, for your school, or office, or farm...etc.

The below chart shows how much would it cost you running it on Bi-Power Solar with a one time payment of 9,000\$, vs. how much would it cost you running it on a rental power line from your local generator with a cost that exceeds 45,000\$!!

Still not sure?

Contact us and we will give you a detailed study with tailored numbers for your case.

FINANCIAL SUPPORT

WE CAN HELP YOU!

We consider the companies that we work with as partners too not only clients, and we also strive for newer ways on which we can help our partners not only technically but financially too!

Low on budget? Very low on budget? ZERO budget?!

Don't worry at all!

We can find you an investor that will cover all your fees, and will only get a return on his investments when YOU are ready!

Not interested in buying any power source, but still looking for some power?

Sure, we got you.

We can install a power generation source at your site and sell you power based on your consumption! You will be getting power with zero initial payments.
