Personal Protective Equipment

VIKING LIFE-SAVING EQUIPMENT
Your safety is safe with us

Ready for the new regulations?

VIKING is already compliant

VIKING SOLAS fire suits fulfil the EN 469:2020 standards that have been adopted by the MED. This standard will be a requirement for SOLAS fire suits purchased for vessels starting from August 2024.

Go in strong with VIKING

Firefighting in marine and offshore environments

VIKING is widely known as the leading global supplier of protective suits, lifejackets and accessories for marine and offshore personnel.

Unbeatable knowledge and expertise

We are also a leader in firefighter protection for professional fire departments all over the world. This combined expertise is evident in our range of purpose-built fire suits for marine and offshore needs.

It enables our designers to strike the right balance of the safety and mobility firefighters need to concentrate on saving lives and assets.

Choose from a range of models, protection levels and accessories for just the right level of protection. Our SOLAS fire suits and accessories are designed and tested to the latest regulations and requirements of the marine and offshore industries.

Approvals include SOLAS/MED, USCG, EN469: 2020 and NFPA. We can supply a complete package or single items for firefighters working in marine environments.

Protection Durability Mobility Comfort

SOLAS firefighter package

with VIKING YouSafe™ Torch

There are specific SOLAS/MED requirements for SOLAS fire-fighting as well as flag state approval requirements. VIKING can supply a full package of approved products.

HYDROPEN™ SYSTEM

Fighting container fires at heights and on deck

Already selected by several major cargo shipping operators, the revolutionary HydroPen™ System is fast becoming a fire fighting must-have.

Powered only by water pressure from the fire main, the easy to operate system quickly drills through the door of a standard shipping container to extinguish the fire inside.

The system comes with a telescopic lift and can be deployed to effectively and safely tackle fires both at deck levels and high up in the container stack.

System highlights

- Proven in actual fire use
- Simple and safe to operate
- Fully automatic direct firefighting
- Works with water, foam and CO₂
- Telescopic lift for firefighting at height
- Low maintenance

Electric vehicle fires (EV/EVS)

Rosenbauer BEST Battery Extinguisher System

The new Rosenbauer BEST system safely and quickly extinguishes fires in high voltage batteries based on lithium-ion technology which are typically used in electrical vehicles.

The system works by going directly to the source. The firefighter places an extinguishing unit under the burning battery and operates the unit using a control panel from a safe distance. A spear penetrates the battery housing and douses the battery with water. This cools the battery modules or the battery cells inside the modules and quickly stops the chemical reaction in the cells and the consequent heating.

ITEM NO. 1154843

Features

- **Safer for crew** as it is not necessary to stay near the vehicle
- **Fast and effective** as it propels water directly to the source
- **Resource-efficient** and self-powered using controlled low water pressure
- **Tested** on all known European and American battery types in passenger cars, trucks and vans with capacities of up to 120 kWh.

Bridgehill Car Fire Blanket Pro

The Bridgehill Car Fire Blanket can be used to cover a burning vehicle. The blanket will immediately isolate the flames and fumes, and in petrol-driven vehicles the fire will soon extinguish due to lack of oxygen.

Lithium batteries in electrical vehicles will continue to burn even without oxygen or the use of fire extinguishers. In these vehicles the Bridgehill Car Fire Blanket Pro can isolate the fire until it is possible to flood the battery with water and quickly lower the temperature from 1000 °C to 100 °C.

ITEM NO. 1150585

Features

- **Fast and efficient** as it isolates fire in seconds
- **Intuitive** and easy to use with little instruction
- **Eco-friendly** with no use of toxic fumes or liquids
- **Universal** as it works on all types of vehicles

Marine fire safety solutions

VIKING offers a comprehensive range of marine fire safety products, solutions and services to ensure that your onboard firefighting and protection setup is always fully compliant and ready to save lives.

We are safety experts

Our marine fire safety team has the expertise to advise you on a broad range of fire safety topics, including foam performance, storage, handling, fixed and portable firefighting systems, and IMO and Class approvals.

VIKING's service promise is based not only on global warranties and documented compliance, but also on our:

Instant advantages

- Uniquely efficient service planning flow
- Experienced and fully certified service teams
- Reputation as a high-quality service provider
- Quick response capability
- Global availability of service and follow-up
- Full range of cutting-edge marine firefighting equipment
